Peterbilt

A PACCAR COMPANY

MODEL 386-

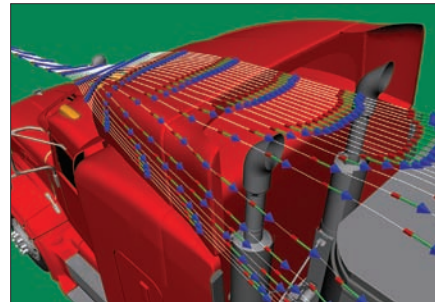

The SmartWay® certified Model 386 blends conventional Peterbilt styling with advanced technology and fuel efficient, aerodynamic performance. The new PACCAR MX engine, premium grade aluminum and advanced composite materials combine for reduced weight and outstanding durability. And the 36", 48", 63" and 70" Unibilt® sleepers are detachable for exceptional versatility. The Model 386 is a unique combination of aerodynamic design and conventional Peterbilt Class.

A PACCAR COMPANY

The Model 386 is recognized as fuel efficient and environmentally friendly by the EPA's SmartWay® program, which establishes a set of fuel-saving, low-emission specs for Class 8 long-haul tractors.

Peterbilt's Aero Package combines a roof fairing and trim tabs, a sleeper roof transition, chassis fairings, an aero battery/tool box, a composite sunvisor, a 3-inch sleeper extender and aero mirrors to provide an estimated 12 percent improvement in fuel efficiency gains over a non-equipped Model 386.

The Platinum interior features a charcoal dash with Coachman grain that reduces glare, is scratch resistant and less likely to fade. The new SmartNav system features real-time vehicle monitoring, truck-specific navigation, Bluetooth connectivity, voice recognition, satellite radio and MP3/iPod capabilities.

The luxurious 70" Platinum sleeper features plenty of storage options such as woodgrain-accented enclosed cabinets, shelving for refrigerators and microwaves, ample overhead lighting and a convenient control panel for the audio and HVAC systems.

The PACCAR MX engine is available with a wide range of horsepower and torque options and delivers maximum performance, superior fuel efficiency, longer service intervals, lower operating costs and higher resale value.

A lightweight all-aluminum cab with huckbolt fasteners, lap seam construction and bulkhead style doors is the leader in toughness, corrosion resistance and water-tight performance.

The Model 386 features an optimized front axle placement for outstanding maneuverability and handling and maximum payload capability. Components are positioned for convenient access to key service points.

Peterbilt's proprietary Front Air Leaf Suspension is lightweight and features a 20 percent improvement in ride quality over taper leaf suspensions for an extremely soft ride.

The Peterbilt Model 386 successfully merges distinctive design with aerodynamic efficiency to emerge as Peterbilt's most versatile on-highway truck. For more information on the Model 386, contact your local Peterbilt dealer visit www.peterbilt.com.
