A PACCAR COMPANY

MODEL 387

The Peterbilt Model 387 is a leader in fuel efficiency, technology and serviceability among premium aerodynamic conventional trucks. It's Peterbilt's most fuel efficient truck and is unsurpassed in terms of fit and finish, ride and handling, reliability and overall low cost of operation. The Model 387 performs not only on the highway, but contributes to the bottom line as well. Its durability and resale value are unique distinctions of the Peterbilt Red Oval.

A PACCAR COMPANY

The Model 387 is recognized as fuel efficient and environmentally friendly by the EPA's SmartWay® program, which establishes a set of fuel-saving, low-emission specs for Class 8 long-haul tractors.

A fully integrated cab and sleeper with bonded and huckbolt construction creates a very durable, lightweight package that's offered in two sleeper configurations with four color and two trim options.

The Model 387 features a roomy and spacious interior with a full 30" of walk-through room for swivel seats and dual arm rests. An ergonomic dash is designed for enhanced driver comfort and productivity.

From the rounded crown of the grille and sweeping lines of the hood and fenders to the contoured visor and roof cap, the Model 387 is designed for optimal airflow characteristics.

An advanced high-intensity forward lighting system is integrated into the fenders for outstanding night vision and aerodynamic efficiency. No special tools are required for lamp adjustment or bulb replacement.

The set-back front axle configuration of the Model 387 provides exceptional maneuverability with an improved wheel cut for a tight turning radius.

Visibility on the Model 387 is enhanced with a dramatically sloped hood, contoured visor, large one-piece windshield, generous door and side view windows and large rear view mirrors.

Serviceability is enhanced with a 90° hood opening that provides easier access to key service points. Circuit board technology and multiplexing reduce wiring and improve reliability.

The Model 387 is Peterbilt's Class leader in quality, value and fuel efficiency. For more information on the Model 387, contact your local Peterbilt dealer, visit www.peterbilt.com or call 1-800-552-0024.

SPECIFICATIONS		Aerodynamic	
Model 387 112" & 120" BBC			
Engines	Caterpillar C13 305-470 HP	Caterpillar C15 435-600 HP	Cummins ISX 385-600 HP
Transmissions	Fuller Manual 10, 13, 15, 18 Speed		Fuller Automated 10, 13 Speed
Front Axle Rating	12,000 - 14,600 LBS		
Rear Axle Rating - Single	20,000 - 26,000 LBS
